Become a Cloud Architect at Webkul!

Webkul is building the future of e-commerce, and we need a passionate IT Cloud Engineer to help us scale securely. Imagine designing and maintaining the very backbone of our cloud infrastructure – a robust, resilient, and innovative system powered by AWS, Azure, or GCP.

What You'll Do:

- Deployment of various infrastructures on Cloud platforms like AWS, GCP, Azure, OVH, etc.
- Server monitoring, analysis, and troubleshooting.
- Deploying multi-tier architectures using microservices.
- Integration of Container technologies like Docker, Kubernetes, etc, as per application requirements.
- Automating workflow with Python or shell scripting.
- CI and CD integration for application lifecycle management.
- Hosting and managing websites on Linux machines.
- Frontend, backend, and database optimization.
- Protecting operations by keeping information confidential.
- Providing information by collecting, analyzing, and summarizing development & service issues.
- Preparing & installing the solution by determining and designing system specifications, standards & programming.

What We're Looking For:

- Proficient in Linux.
- Hands-on experience with AWS Cloud or Google Cloud.
- Knowledge of container technology, like Docker.
- Expertise in scripting languages. (Shell scripting or Python scripting)
- Working knowledge of LAMP/LEMP stack, networking, and version control systems like GitLab or GitHub
- Qualification - B.Tech, BE, MCA (Technical background required)
